

Comparative Education has had a nearly 110-year university history. The essence of Comparative Education can thoroughly be understood if we focus on its history and current existence at universities world wide. This thoroughly-revised and expanded second edition commences with Erwin H. Epstein's introductory chapter on 'Crucial Benchmarks in the Professionalization of Comparative Education'. The following five parts present 36 national and regional chapters depicting the evolution and current state of Comparative Education at Universities in Europe, North America, Latin America, Asia and Africa. The volume concludes with a mosaic-like comparison of comparisons of the variegated picture of Comparative Education as an academic field.
